

To view and install fonts in Windows 10, follow the steps below.

1. Click the font you want to download on the Internal Marketing Resource
2. Open your downloads folder and locate the recently downloaded font file
3. Double click to open the Windows font preview pop up box
4. On the Windows Font Viewer, you'll see the font details and its preview. To install the font, click the Install button at the top of the window.
5. The font installation should complete quickly, and there will be no confirmation messages.
6. Your font will be ready to use throughout your desktop

To view and install fonts in Mac, follow the steps below

1. Click the font you want to download on the Internal Marketing Resource
2. Open your downloads folder and locate the recently downloaded font file
